

## **Final thoughts with Minhaz Kazi**

This brings us to the end of our lecture on finding stories with data. Based on what we discussed, you should be able to create your own reports and dashboards using Google Data Studio. Join the discussion groups, if you have questions or if you want to share your own ideas. Make sure to check out the links for additional resources. Also we highly recommend that you try out the Data Studio online course provided by the Google Analytics Academy. This will give you an in-depth understanding of the product. Thanks for joining us. And until next time keep building awesome data stories.
